

SMOKY HILL SUCCESS STORY

Johnny D. was admitted to Smoky Hill Rehab in January 2025 following a hospitalization for cellulitis of the right lower limb. Upon arrival, he could only walk 5 feet with a single-point cane with contact guard assistance and required a wheelchair for mobility. He also needed contact guard assistance for walking, transfers, dressing, and personal hygiene tasks.

Following a 19-day stay with our skilled nursing and therapy team, Johnny no longer needed his wheelchair and was able to walk 1,000 feet using a single-point cane with good balance. He achieved his goal of climbing twelve stairs with a handrail and a cane without losing balance, and improved his upper and lower body dressing to standby assistance.

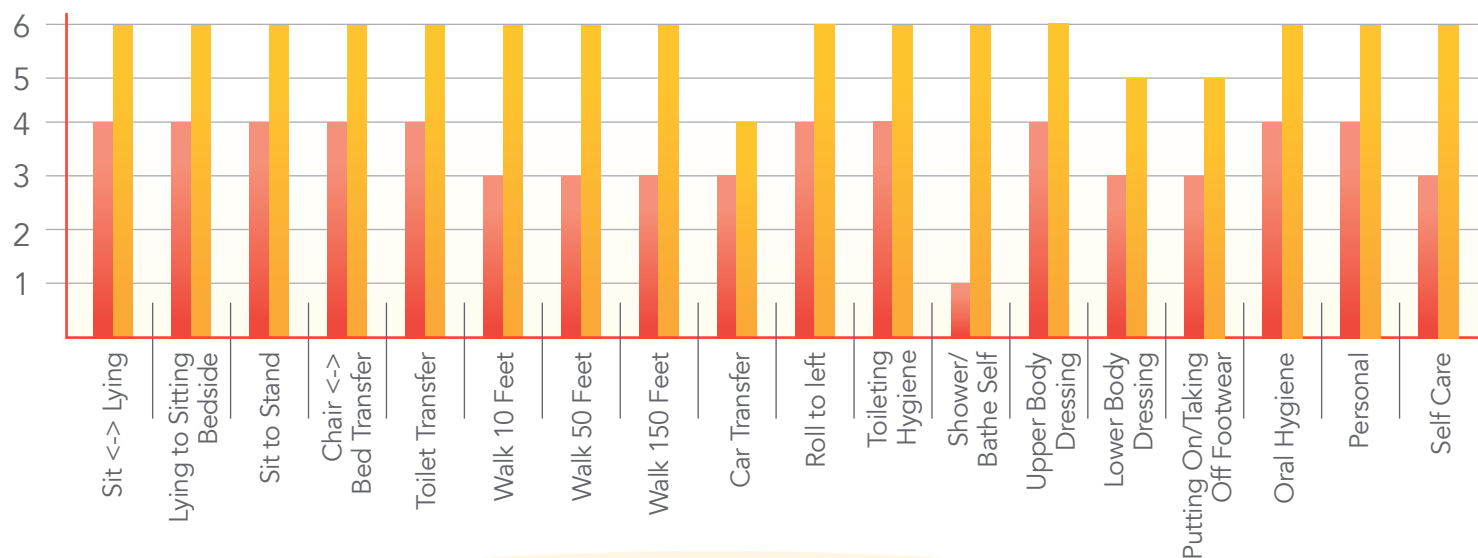

Johnny successfully returned home to continue his progress with home health therapy! **Congratulations on your rehab success!**
