

SMOKY HILL SUCCESS STORY

Karen R. was admitted to Smoky Hill Rehab in January 2025 following a hospitalization for a fall that resulted in a left shoulder fracture. Upon arrival, she was dependent on caregivers for all daily tasks, including upper and lower body dressing, transfers, and toileting. She could only walk 10 feet with minimal assistance.

Following a 14-day stay with our skilled nursing and therapy team, Karen made significant progress. By discharge, she was able to walk 500 feet with minimal assistance using a single-point cane. She also improved to minimal assistance for upper body dressing and moderate assistance for lower body dressing.

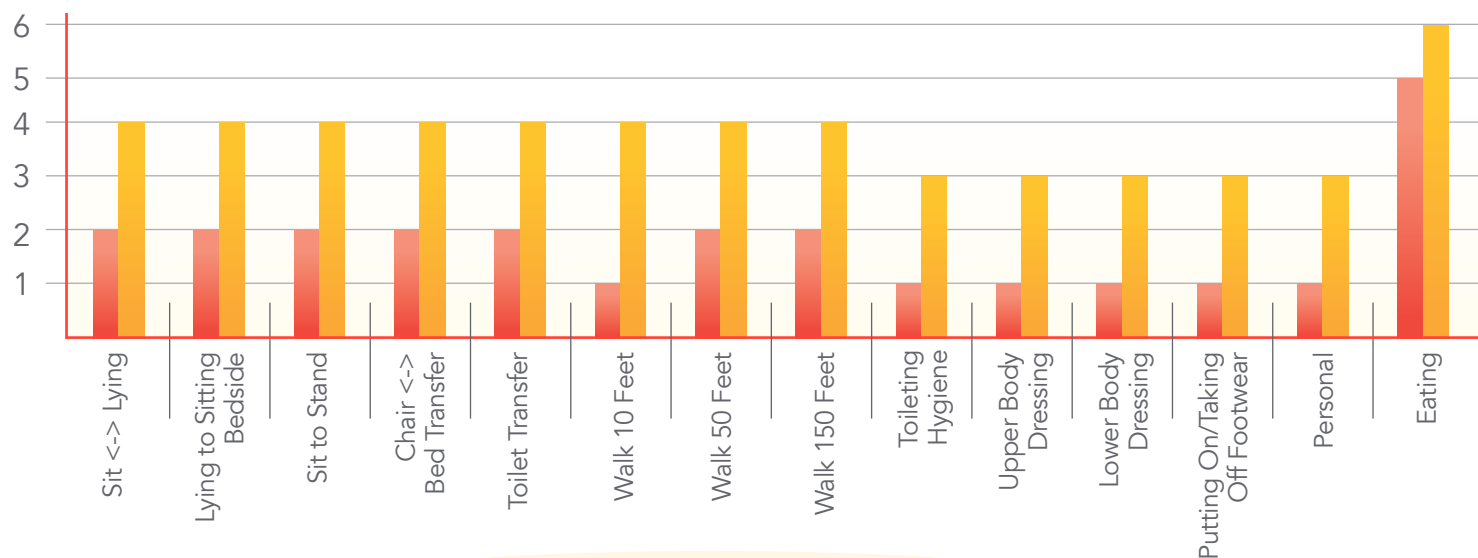

Karen successfully returned home to her apartment with her husband to continue her progress with home health therapy! **Congratulations on your rehab success!**
